DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakagawa (5,723,828).

With respect to Claims 1 and 4, Nakagawa teaches an intake hose (Figure A, #101; Figure A is an exploded view of Nakagawa, Figure 1b-1, provided by the Examiner at the end of this Office Action); a hose expanding part (103) formed at a certain portion of said intake hose (101); an inner cover (104) formed inside said hose expanding part (103); a wall (102) formed for obtaining a sealed area between said hose expanding part (103) and said inner cover (104); and an inner hose (105) protruding out from said inner cover (104) for interconnecting the inside of said intake hose (101) and said sealed area; wherein the components are integrally formed by molding (Col. 4, Lines 56-57).

With respect to Claims 2 and 3, Nakagawa teaches an inner hose (Figure A, #105) extended in length for reducing low-frequency noise, or shortened in length for reducing high-frequency noise emitted from said intake hose (105) (Col. 5, Lines 17-22).

With respect to Claim 5, Nakagawa teaches an intake hose (Figure A, #101) configured and dimensioned with an expanded portion (103); and an inner member (104) couplable with the expanded portion (103), wherein said inner member (104) is

adjustable in length to function as a resonator and reduce intake noise (Col. 5, Lines 10-22).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pertinent arts of record relating to noise control type intake hoses are disclosed in the PTO-892.
